

# ARBORCHEM

---

# DEFOAMER

---

## CONTAINS

Dimethylsiloxane emulsion

## DIRECTIONS FOR USE

Add defoamer to spray tank at a maximum rate of one ounce per 100 gallon. Actual use rate will vary depending upon type of agitation and chemicals use.

**KEEP OUT REACH OF CHILDREN**

## CAUTION

**FOR INDUSTRIAL USE ONLY**

Manufactured For:  
**ARBORCHEM Products Co.**  
943 Nixon Drive  
Mechanicsburg, PA 17055

H6L080G

Made in U.S.A.

## ARBORCHEM DEFOAMER

**ARBORCHEM DEFOAMER** is a silicone based, latex emulsion specially formulated to be highly effective in controlling foams developed in herbicide spray solution.

Foam develops in spray tanks due to surfactant/herbicide interactions, the addition of adjuvants, and the effects of paddle agitation and/or pump recirculation.

At a rate of only one ounce per 100 gallons of spray mixture, **ARBORCHEM DEFOAMER** will prevent foam from occurring and dissipate any existing foam. It can prevent and eliminate foam in both aqueous and oil-based solutions.

**ARBORCHEM DEFOAMER** is packaged in one quart plastic containers with an easy dispensing spout. **DEFOAMER** is available at twelve quarts per case; cases can be palletized for quantity shipping.
